'Jesus said, "I have come that you may have life in all its fullness'
(John 10:10)

Faith- Values Action

Design and Technology Curriculum

D.T curriculum Intent:

At Oak Hill CE Primary School, as a Thrive school, we want to prepare our pupils for their future lives by supporting them to develop key skills through the use of the Cornerstones Curriculum.

We believe that our children deserve a balanced curriculum that enables them to develop a deep understanding of all subjects and the interconnections between them alongside developing our children's knowledge and skills, learning behaviours and personal qualities.

The design and technology projects are well sequenced to provide a coherent subject scheme that develops children's designing, planning, making and evaluating skills. Each project is based around a design and technology subject focus of structures, mechanisms, cooking and nutrition or textiles. The design and technology curriculum's electronic systems and IT monitoring and control elements are explicitly taught in our science projects to ensure the links between the subjects are highlighted.

D.T Curriculum Implementation

As the children move through the school they will focus on three key drivers within design and technology that is also explored in Art lessons and Art and design lessons. This enables the children to revisit skills, build on previous learning and apply their skills and understanding in different contexts enabling them to develop a deeper understanding.

The three key drivers skills are:

- Sewing
- Construction and mechanisms
- Food preparation

The following explores the Design and Technology journey a child will have from year 1 to year 6.

Key Stage 1 In the spring term project *Taxi!*, they learn the term 'mechanism' and assemble and test wheels and axles. In the summer term, children begin to learn about food sources in the project *Chop, Slice and Mash* and use simple preparation techniques to create a supermarket sandwich. In the Summer term of Year 1, children will also begin to learn about structures in the project *Shade and Shelter* before designing and making a shelter.

In the autumn term of Year 2, children learn more about food in the project *Remarkable Recipes*, where they find out about food sources, follow recipes and learn simple cooking techniques. In the spring term project *Beach Hut*, children develop their knowledge of structures further, learning to cut, join and strengthen wood for the first time. In the summer term, children begin to develop their understanding of textiles in *Cut, Stitch and Join*. They learn to sew a simple running stitch, use pattern pieces and add simple embellishments. They also continue to learn about mechanisms in the project *Push and Pull* by using sliders, levers and linkages in products.

Lower Key Stage 2 In the autumn term of Year 3, children continue to learn about food, understanding the concept of a balanced diet and making healthy meals in the project *Cook Well, Eatwell*. In the spring term project *Making it Move*, children extend their understanding of mechanisms by exploring cams and using joining and finishing techniques to make automaton toys. In the summer term project *Greenhouse*, they continue to develop their knowledge of structures, using triangles and braces for strength. They design and build a greenhouse, using their understanding of opacity and transparency and the needs of plants from science learning to inform their design.

In the autumn term of Year 4, children continue to develop their understanding of food in the project *Fresh Food, Good Food*. They learn about food safety and preservation technologies before designing and making packaging for a healthy snack. During the spring term project *Functional and Fancy Fabrics*, children continue to explore textiles, learning about the work of William Morris before designing, embellishing and finishing a fabric sample. In the summer term project *Tomb Builders*, they build on their knowledge of mechanisms, learning about six simple machines and using their knowledge to create a lifting or moving device prototype. They also explore and use electrical systems and IT monitoring and control in the science project *Electrical Circuits and Conductors* for the first time.

Upper Key Stage 2 In the autumn term of Year 5, children deepen their understanding of mechanisms by studying pneumatic systems in the project *Moving Mechanisms*. They learn about the forces at play and create a prototype for a functional, pneumatic machine. In the spring term project *Eat the Seasons*, children continue to explore food and nutrition, learning about seasonal foods and the benefits of eating seasonally. In the summer term, they learn more about structures in the project *Architecture*, studying the history of architecture and developing new ways to create structural strength and stability. They use computer-aided design and consolidate their making skills to produce scale models. They also explore the electrical conductivity of materials before making products incorporating circuits in the science project *Properties and Changes of Materials*.

In the autumn term of Year 6, children learn about processed and whole foods in the project *Food for Life*, creating healthy menus from unprocessed foods. In the spring term project *Engineer*, children consolidate their knowledge of structures, joining and strengthening techniques and electrical systems by completing a bridge-building challenge. In the summer term project *Make Do and Mend*, they extend their knowledge of textiles by learning new stitches to join fabrics and using pattern pieces to create a range of products.

D.T Curriculum Impact

Children will have clear enjoyment and confidence in Design and Technology that they will then apply to other areas of the curriculum. Through carefully planned and implemented learning activities the children develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world. They will be resilient to challenges and develop the courage to fail and use it as an opportunity to develop and grow. Through the D.T curriculum they will gain a firm foundation of knowledge and skills to see them equipped to take on further learning in High School.
